

APPLIED BEHAVIOR CONNECTIONS LLC

We are committed to achieve measurable growth in each individual we work with, to assist in his or her journey to more independence.

Applied Behavior Connections provides a network of qualified professionals that offers intensive Applied Behavior Analysis (ABA) to children with developmental delays and behavior challenges. They work with all ages and abilities, interacting with schools and parents of each student to ensure continuity is reached between all learning environments.

What is ABA?

ABA is a set of positive principles that forms the basis for many behavioral treatments. It is based on the science of learning and behavior. This science includes general rules about how behavior works and how learning takes place. ABA therapy is used to increase language and communication skills, improve attention, focus, social skills, self help skills, memory and academics.

Applied Behavior Connections LLC

Applied Behavior Connections strives to provide exceptional high-level care and education in Applied Behavior Analysis (ABA) for children with Autism Spectrum Disorder, as well as those struggling with behavior deficits. The company was developed by three highly qualified individuals with over 30 collective years in the field of ABA.

Applied Behavior Connections LLC works with children of all ages and abilities; interacting with schools and parents of each student. They are committed to providing high-level professional and supportive ABA services for children with disabilities and their families. To set them apart Applied Behavior Connections LLC strongly believes in taking care of their team members to develop a community of happy, caring, highly professional and educated individuals working with each client. Each partner is also highly invested in working within the community and offering resources to better assist clients and their families. This includes not only developing relationships with pediatricians, teachers, and other community outreach programs but also offering classes and educational seminars to individuals looking for more information on ABA and its benefits. Services are offered from Logan to Sandy and from Wasatch County to West Valley.

WHY ABA AND AUTISM?

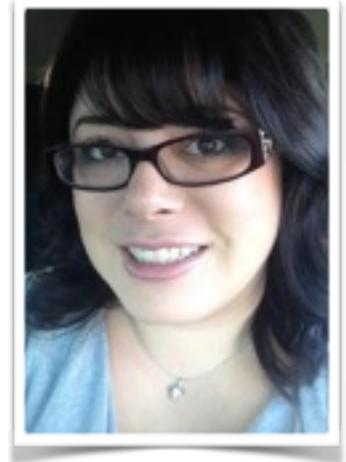

ABA is the only treatment for autism whose benefits have been consistently validated by independent scientific research. ABA has also been endorsed as an effective intervention for autism by the American Academy of Pediatrics and the United States Surgeon General.

TARGET AREAS

ABA programs are developed to help each child reach his or her highest potential. Goals focus on the areas of communication, intellectual development, social skills, improvement of attention and focus, daily living, self help, memory and academics.

Maria Loveless

Maria is a Board Certified Behavior Analyst. She has been working with individuals with disabilities (emphasis with children with autism) and their families, in home, community, and school settings since 2005. Her work experience incorporates behavior consultation, staff/parent training, and program development.

Brittany Coyle

Brittany Coyle is a Board Certified Behavior Analyst (BCBA) with her masters degree in ABA. She has extensive experience working with children diagnosed with Autism Spectrum Disorder in their homes, schools and clinical settings for the last 10 years.

Jennifer Burnazos

Jennifer Burnazos has her bachelors in sociology. She has been a consultant and paraprofessional for 10 years. Jennifer has experience with ABA, PRT, Positive behavior support and Verbal Behavior modalities.
