

## 2009 ICU Central Line-Associated Blood Stream Infection Rates for Patients $\geq$ 1 Year of Age, 21 Utah Hospitals, by ICU Type<sup>1</sup>

<sup>1</sup> Only hospitals with more than 50 central line days included. Large confidence intervals result from institutions with few central line days accompanied by few central line associated blood stream infections.

<sup>2</sup> Includes hospitals with specialized ICU types, including thoracic, trauma, respiratory, cardiac, medical, burn, pediatric, surgical, and neurosurgical.

<sup>3</sup> Hospitals with one large ICU combining medical and surgical care.
