

March 22, 2013

Dear Provider:

As you may know, in September licensing rules for use zones for your outdoor playground equipment take effect. Because we know that there can sometimes be a cost to correcting use zone problems, we want to make sure that our inspections of Providers' use zones are completely accurate. In order to help us accomplish this, a Lead Licensing Specialist who has also completed specialized playground inspection training will be conducting the outdoor portion of your Annual Announced Inspection.

This means that your regular Licensing Specialist will contact you as he or she always has done to schedule your next Annual Announced Inspection, but when that inspection is completed, it will not include an inspection of your outdoor area. A Lead Licensing Specialist will contact you and let you know when he or she will be in your area and will assess your outdoor area at that time.

If you have any questions about this inspection, please call our Playground Supervisor, Lynda Worthington at 801-374-7803.

Thank you for your hard work on behalf of Utah's children.

Sincerely,

A handwritten signature in black ink, appearing to read "Simon Bolivar". The signature is fluid and cursive, with a large initial "S" and "B".

Simon Bolivar, Administrator
Child Care Licensing Program
