

Utah Small Area Information

In order to facilitate reporting data at the community level Utah has been divided into 61 small areas. Areas are determined based on specific criteria, including population size, political boundaries of cities and towns, and economic similarity. The health measures that are reported by small area are those with events occurring with sufficient frequency to be meaningful. The IBIS query system allows you to query by small area for the Birth Certificate and Infant Mortality databases, the Mortality database, the Hospital Discharge and Emergency Department Visit databases, and the Utah Population Estimates database.

To use the small area query system select “Yes” on the “Do you want to limit your results to a particular sub-group, such as a county or age group?” question. One of the checkbox options will be small area.
