

Highlights & Reference Tables

Utah's 12 Local Health Districts

In the tables that follow, some data are presented for each of Utah's 12 local health districts. There are six single-county and six multi-county health districts, as shown above.

A Profile of Utahns Without Coverage

Health Insurance Coverage by Sex, Utah, 2001

Source: 2001 Utah Health Status Survey.

Percentage Distribution of Persons With No Health Insurance Coverage by Sex, Utah, 2001

Source: 2001 Utah Health Status Survey.

- The majority of both men and women in Utah had some sort of health insurance coverage.
- A slightly higher percentage of men than women did not have health insurance coverage. However, this difference was not statistically significant.

A Profile of Utahns Without Coverage

Health Insurance Coverage by Age, Utah, 2001

Source: 2001 Utah Health Status Survey.

Percentage Distribution of Persons With No Health Insurance Coverage by Age, Utah, 2001

Source: 2001 Utah Health Status Survey.

- Of the various age breakdowns, infants under 1 year old (1.5%) and persons 65 and older (0.7%) were the least likely to be without health insurance coverage.
- Persons aged 19 to 26 years old were the most likely to be uninsured, followed by those aged 27 to 34.

Health Insurance Coverage by Age and Sex, Utah, 2001

Source: 2001 Utah Health Status Survey.

* Not enough data cases to provide a precise estimate.

- Males aged 19 to 26 were more likely to be uninsured than any other age/sex group.

A Profile of Utahns Without Coverage

Health Insurance Coverage by Education Level, Utah, 2001

Source: 2001 Utah Health Status Survey.

Percentage Distribution of Persons With No Health Insurance Coverage by Education Level, Utah, 2001

Source: 2001 Utah Health Status Survey.

- Utah adults who had not completed high school were more likely to be without health insurance.
- Eighty-two percent of those who were uninsured had at least a high school diploma.
- Utah adults with a four year college degree or more were the least likely to report being uninsured.

1 Population estimates of Sex and Age Groups based on Utah Process Economic and Demographic (UPED) model published in January 2002 by the Utah Governor's Office of Planning and Budget; all others based on the 2001 UHSS and rounded to the nearest 100 persons.

2 Plus or minus 95% confidence interval.

3 Rounded to the nearest 100 persons.

4 Figures in these columns may not sum to the total because of missing values on the grouping variables.

*** Insufficient sample size for calculation of population estimates.

2001 Utah Health Status Survey, Utah Department of Health

- Hispanic persons were more than three times as likely to be uninsured than non-Hispanic persons (25.8% compared to 7.2% respectively).
- Persons living below 100% of poverty were much more likely than others to lack health insurance coverage.
- In general, as poverty level rises, so does the rate of persons with health insurance coverage.

A Profile of Utahns Without Coverage

Health Insurance Coverage by Annual Household Income, Utah, 2001

Source: 2001 Utah Health Status Survey.

Percentage Distribution of Persons With No Health Insurance Coverage by Annual Household Income, Utah, 2001

Source: 2001 Utah Health Status Survey.

- Households with annual incomes under \$20,000 were substantially more likely to be without health insurance coverage than other households.
- Households with annual incomes of \$20,000 to <\$45,000 made up the highest proportion of uninsured households.
- As annual household income increased, the number of those reporting no insurance coverage decreased.

*** Insufficient sample size for calculation of population estimates.

2001 Utah Health Status Survey, Utah Department of Health

- Males who were aged 27 to 34 from households with annual incomes under \$20,000 were more likely than any other group to be uninsured.

Health Insurance Coverage by Poverty Level, Utah, 2001

Source: 2001 Utah Health Status Survey.

Note: The Federal Poverty Level (FPL) for 2001 was \$17,650 for a family of four.

Percentage Distribution of Persons With No Health Insurance Coverage by Poverty Status, Utah, 2001

Source: 2001 Utah Health Status Survey.

- Insurance coverage is more common in more affluent households. Those below 100% of poverty have the highest uninsured rate.

Health Insurance Coverage by Poverty Status and Age, Utah, 2001

Source: 2001 Utah Health Status Survey.

* Not enough data cases to provide a precise estimate.

Note: The Federal Poverty Level (FPL) for 2001 was \$17,650 for a family of four.

- The proportion of persons without health insurance coverage was highest for 19 to 26 year olds living below 100% of poverty (41.5%), followed closely by those at the same Federal Poverty Level, ages 27 to 34 (41.1%).
- Persons over 300% of poverty were least likely to be uninsured regardless of age.
- The proportion of persons with no health insurance coverage was lowest among those aged 50 to 64 years living above 300% of poverty.

2001 Utah Health Status Survey, Utah Department of Health

- Looking at lack of insurance coverage for adults age 19-64 by employment status, we found that retired persons had the lowest percentage of persons who lacked coverage (1.6%).
- Persons who were employed full time had the second-lowest percentage uninsured (9.6%). However, full-time employed persons constituted the largest group, overall, and made up a majority of Utah adults without coverage (58.9%).
- Students, part time, and unemployed persons (16.0%, 13.4%, and 18.3% respectively) were the most likely to be uninsured.
- Efforts aimed at decreasing the number of Utahns who lack health insurance coverage might do well to involve employer-provided health insurance coverage.

Health Insurance Coverage by Employment Status and Income, Utah Adults Age 19-64, 2001

Source: 2001 Utah Health Status Survey.

* Not enough data cases to provide a precise estimate.

- Utah adults who worked full time but who had annual household incomes under \$20,000 were substantially more likely than other full time workers to be without health insurance.
- This same pattern can be seen for those adults who were employed part time and who were keeping house.

2001 Utah Health Status Survey, Utah Department of Health

- Utah adults living below 100% of poverty were significantly more likely to be uninsured, regardless of employment status.

Health Insurance Coverage by Self Employment Status and Income, Utah Adults Age 19-64, 2001

Source: 2001 Utah Health Status Survey.

- Among Utah adults who were employed, those who were self employed were more likely than those who were not self employed to lack health insurance, regardless of income.
- 58.1% of self employed Utahns with annual household incomes under \$20,000 were uninsured.

2001 Utah Health Status Survey, Utah Department of Health

A Profile of Utahns Without Coverage

Health Insurance Coverage by Marital Status and Sex and Children in Household, Utah Adults Age 19-64, 2001

Source: 2001 Utah Health Status Survey.

- Married adults were more likely to have health insurance coverage than either never married adults or divorced/separated/widowed adults.
- Males who were never married with children had the highest percentage of those uninsured (23.7%) for all males and females.
- Females who had children and were divorced/separated/widowed were more likely than other females to lack health insurance, with 22.3% lacking health insurance coverage.

2 Plus or minus 95% confidence interval.

3 Rounded to the nearest 100 persons.

4 Figures in these columns may not sum to the total because of missing values on the grouping variables.

*** Insufficient sample size for calculation of population estimates.

- Hispanic persons were more than three times as likely to be uninsured than non-Hispanic persons.
- For those Utahns living below 100% of poverty, Hispanic persons were twice as likely to lack health insurance than non-Hispanic persons.

Health Insurance Coverage by Hispanic Status and Employment, Utah Adults Age 19-64, 2001

Source: 2001 Utah Health Status Survey.

* Not enough data cases to provide a precise estimate.

- A significantly higher proportion of Hispanic persons than non-Hispanic persons lacked health insurance coverage, regardless of employment status.
- Nearly four times as many Hispanic than non-Hispanic part time workers were uninsured.

2001 Utah Health Status Survey, Utah Department of Health

- 24.5% of Hispanic persons with high school or some college lacked health insurance coverage, compared to 11.1% of non-Hispanic persons with the same level of education.
- Hispanic self employed persons were over 2.5 times more likely to be uninsured than non-Hispanic self employed persons.

Health Insurance Coverage by Race, Utah, 2001

Source: 2001 Utah Health Status Survey.

* Among the 141 Black or African Americans in the 2001 HSS Sample, 5.4% reported being uninsured. This rate is not reported however, because the precision of this estimate did not meet our criteria for publication.

Note: An individual may have indicated multiple race/ethnic categories.

- Asian Utahns were more likely to report having health insurance than Utahns of other races.
- Persons who reported race as ‘other’ were the most likely to lack health insurance coverage.

Lack of Coverage in Utah: The Nature of the Problem

Time Uninsured by Poverty Status, Utah, 2001

Source: 2001 Utah Health Status Survey.

Note: The Federal Poverty Level (FPL) for 2001 was \$17,650 for a family of four.

- Uninsured persons living at 101-200% of poverty were more likely to be uninsured for one year or more than other uninsured persons (72.0%), followed closely by those persons living below 100% of poverty at 71.3%.

2001 Utah Health Status Survey, Utah Department of Health

- 66.9% of uninsured persons in Utah reported having been without health insurance for at least one year.
- Uninsured males were more likely to report being uninsured for one year or more than uninsured females.
- Davis County health district had the lowest percentage of uninsured persons reporting to be uninsured for one year or more.
- About a third of uninsured persons in the survey fell into a group that could be considered “chronically uninsured.” This group had lacked health insurance coverage for four years or longer.

Lack of Coverage in Utah: The Nature of the Problem

Reasons for Being Uninsured, Utahns Without Health Insurance, Utah, 2001

Source: 2001 Utah Health Status Survey.
 Note: Respondents were allowed to cite more than one reason.

Reasons for Being Uninsured by Poverty Level, Utahns Without Health Insurance Coverage, 2001

Source: 2001 Utah Health Status Survey.
 * Not enough data cases to provide a precise estimate.
 Note: The Federal Poverty Level (FPL) for 2001 was \$17,650 for a family of four. Respondents were allowed to cite more than one reason.

- Over 50% of those who were uninsured reported that they could not afford health insurance. This varies little when broken down by poverty level.
- One third of Utahns who were uninsured reported that their “employer does not offer insurance” as a reason they were uninsured.

2001 Utah Health Status Survey, Utah Department of Health

- 33.1% of uninsured Utahns said that their employer not offering insurance was a reason they were without health insurance coverage.
- Southeastern health district had the highest percentage of uninsured persons (53.9%) who reported that their employer did not offer insurance as a reason for being uninsured.
- 39.5% of uninsured full time employees reported that a reason they did not have insurance was that an employer did not offer it.

3 Rounded to the nearest 100 persons.

Note: Figures in these columns may not sum to the total because of missing values on the grouping variables.

2001 Utah Health Status Survey, Utah Department of Health

- 7.7% of uninsured persons had arthritis.

Health Insurance Coverage by Plan Type

Health Insurance Coverage by Type, Utah, 2001

Source: 2001 Utah Health Status Survey.

* "Private plan" consists of insurance through current or former employer or union, insurance purchased directly from an insurance company, and insurance through someone who does not live in the household.

** Children's Health Insurance Program (for persons age 18 and under only)

*** "Another government plan" includes Military, CHAMPUS/Tricare, the V.A., or Indian Health Services

Note: Bars are not mutually exclusive, both by definition, and because a person may be covered by more than one type of plan.

- Most insured persons had insurance through private insurance and/or through a current or former employer or union.

2001 Utah Health Status Survey, Utah Department of Health

Access Problems Due to Cost, Persons With Health Insurance, Utah, 2001

Source: 2001 Utah Health Status Survey.

- For insured persons, problems accessing care due to the cost of services and cost of prescriptions decreased as annual household income increased.
- Insured persons with fair or poor health were more than 2½ times as likely to report access problems due to cost of services than persons with good or excellent health (16.6% and 6.3% respectively).
- Problems with the cost of prescriptions increased steadily with age.

Table 40. Percentage of Persons Reporting Problems With Access to Health Care Because They Could Not Afford the Services
