

Figure 1.1 Percentage of Persons Who Were in Fair or Poor Health, Utah, 1996, 2001, and 2003

Figure 1.2 Percentage of Persons Who Were in Fair or Poor Health by Age and Sex, Utah, 2003

- The percentage of the population reporting fair or poor health decreased between 1996 and 2003. However, this finding was not significant.
- Across all age groups, females were more likely than males to report fair or poor health. This difference was greatest among those aged 50 to 64 years.

Figure 2.2 Percentage of Adults Who Accomplished Less as a Result of Their Physical Health by Age and Sex, Utah, 2003

- The percentage of those reporting that they accomplished less because of their physical health decreased slightly between 2001 and 2003.
- Women aged 65 and over were most likely to report limitations due to physical health.

Figure 3.1 Percentage of Adults Who Accomplished Less as a Result of Their Mental Health, Utah Adults Age 18+, 1996, 2001, and 2003

Figure 3.2 Percentage of Adults Who Accomplished Less as a Result of Their Mental Health by Age and Sex, Utah, 2003

- People were less likely to report accomplishing less because of their mental health in 2003 than 2001 or 1996.
- Women were more likely to report limitations due to mental health. These differences were most pronounced for women aged 35 to 49 and 65 and over. In fact, women aged 65 and over were more than twice as likely than men to report limitations due to mental health.
