

# Health Insurance Coverage by Plan Type

# Health Insurance Coverage by Plan Type

## Figure 29-34.1 Health Insurance Coverage by Source, Utah, 2005

Source: 2005 Utah Health Status Survey

\* "Another government plan" includes Military, Tricare, or the V.A.

Note: Bars are not mutually exclusive, both by definition, and because a person may be covered by more than one type of plan.

- The estimates on this page and in tables 29–35 are for insured Utahns only. They do not include the uninsured population.
- Each individual can have more than one source of insurance coverage: groups are not mutually exclusive.
- Most insured persons had insurance through a current or former employer or union (77.5%).
- Among insured children aged 0 to 18 years, 5.7% were covered by the Children’s Health Insurance Program (Table 35).

Figure 35.1 Health Insurance Coverage Through CHIP by Local Health District, Insured Utah Children Aged 0-17, 2005

Source: 2005 Utah Health Status Survey

\*\*\* Not enough data cases to provide a precise estimate

- The percentage of children (aged 0 to 18 years) insured by CHIP increased from 4.1% in 2004 to 5.7% in 2005.
- Southwest Utah health district had the highest percentage of children (aged 0 to 18 years) insured through CHIP (15.5%).
- The proportion of insured children insured by CHIP was negatively associated with poverty status. Children in households with incomes at or below 100% of poverty had the highest levels (15.5%) and children in households with incomes above 300% had the lowest (0.3%).
- However, the percentage of children covered by CHIP increased across all levels of poverty from 2004 to 2005.
