

Traumatic Brain Injury

The Utah Department of Health and Utah Brain Injury Council would like to understand how to better help people who have a traumatic brain injury (TBI).

We have partnered with Lighthouse Research, a professional research firm, to conduct interviews and focus groups with TBI survivors and their families. The interviews and focus groups will be held in August 2015 in both Salt Lake City and the Logan/Brigham City areas.

You will not be asked to purchase anything as a result of participating and your information will not be sold or used for other purposes. As a thank-you for your time, you will receive \$75.

If you or your family is interested in participating in the interviews and focus groups, please contact Jenny Johnson at the Utah Department of Health at 801-538-9416 or jennyjohnson@utah.gov.
