Description of Measure

State Identified Measureable Result (SIMR)

As a result of data analysis and in-depth discussion that has occurred over the past year by the SSIP Core Work Team, SSIP Leadership Team, and the SSIP Broad Stakeholder Group, Utah's SiMR is to "substantially increase the rate of growth in positive social-emotional skills (including social relationships) for culturally diverse infants and toddlers with disabilities in Utah by the time they exit Part C." These children will move closer in functioning to that of same-aged peers, as reflected in Summary Statement 1.
