### **Free Program Helps Eligible Uninsured Utahans Save on Prescription Medicines**

As the economy struggles, those without insurance are finding it increasingly difficult to stay healthy. In fact, recent studies have found that consumers are cutting back on medical care to pay for more immediate needs. More often, consumers are turning to healthcare professionals and other trusted experts for guidance on how to best afford their prescription medicines.

Fortunately, resources are available that can help uninsured individuals save on their prescriptions – without sacrificing their family’s well being.

One free program, Together Rx Access, which is sponsored by many of the nation’s leading pharmaceutical companies, provides eligible individuals and families with immediate and meaningful savings on prescription products right at their neighborhood pharmacies.

Cardholders simply bring the Together Rx Access<sup>®</sup> Card to their neighborhood pharmacist along with their prescription, and the savings are calculated right at the pharmacy counter. Most cardholders save 25 to 40 percent\* on a variety of brand-name prescription products. Savings are also available on a wide range of generics.

There are three easy ways to enroll. And, no documentation is required.

- Visit TogetherRxAccess.com.
- Call 1-800-250-2839.
- Complete and return a short paper application by mail.

Healthcare professionals interested in ordering enrollment materials for distribution to uninsured patients, can visit <http://www.togetherrxaccessonline.com/order/>.

For more information, call 1-800-250-2839 or visit [TogetherRxAccess.com](http://TogetherRxAccess.com). Visitors to the Program's website can determine eligibility and immediately enroll in the prescription saving program; access the Program's Drug List and Pharmacy Locator; learn how health reform may impact them and their family; uncover ways to better manage chronic conditions; and connect with others who are also striving to maintain healthy habits.

# # #

\*Each cardholder's savings depend on such factors as the particular drug purchased, amount purchased, and the pharmacy where purchased. Participating companies independently set the level of savings offered and the products included in the program. Those decisions are subject to change.
