American Indian/Alaska Native Health in Utah

Submitted by:
Melissa Zito, MS, RN
American Indian/Alaska Native Health Liaison, Health Policy Consultant
Office of AI/AN Health Affairs, Utah Department of Health
OVERVIEW

The Office of American Indian/Alaska Native (AIAN) Health Affairs, AIAN Health Liaison and Health Policy Consultant are located in the Utah Department of Health’s Executive Directors Office. The Department’s Vision is for Utah to be a place where all people can enjoy the best health possible, where all can live and thrive in healthy and safe communities. Historically, AIAN’s living in Utah suffer higher rates of health disparities than other groups and Utah overall (appendix A). The mission of this Office is to raise the health status of the AIAN population in Utah to that of the general population in Utah.

The primary goal of the Office is to promote and coordinate collaborative efforts between the Department, Tribal Governments, state and local partners and AIAN communities living in Utah to improve both availability and accessibility of quality health care and health care resources both on and off the reservations. There are three primary objectives for achieving this goal;

- Interact with the following to improve health disparities:
  - Tribal Leadership,
  - Tribal Health programs,
  - State agencies and officials,
  - Local Health Departments,
  - Providers of health care in the private sector.

- Facilitate education, training, and technical assistance regarding public health & medical assistance programs to the AIAN population in Utah.

- Staff an Advisory Board (Utah Indian Health Advisory Board) by which Utah’s tribes may consult with state, federal and local agencies for the development & improvement of public health policy and programs to increase access and health care for the AIAN population both on & off the reservations in Utah.

Current goals include, but are not limited to:

- Improve outcomes targeting;
  - Data collection, analysis, reporting
  - Data Sharing Agreements
  - Strengthening families; Women’s Health & Maternal Child Health
  - Improving access to services, programs & reimbursement
  - Public Health Emergency Preparedness & Infectious Disease Response Planning

- Tribal Consultation
- Community partnering and collaboration

DEMOGRAPHICS

The 2015 Census reports there are approximately 50,000 American Indians/Alaska Natives (AIAN) living in Utah. Roughly 33% are children ages 0-17 years of age, 63% are 18-64 and 4% are 65 years of age and older. Salt Lake County has the largest number AIAN residing there; ~57% with San Juan County being the second largest.
## STRENGTHS

**A. Improved communication between state agencies addressing health care, health policy, implementation, and the Indian Health Services (IHS)/Tribal/Urban Indian Health (I/T/U) programs**
- UDOH Tribal Consultation Policy
- UDOH Indian Health Liaison designation to focus and work directly with I/T/U
- UDOH Model utilized within the DHS and the DWS
- Utah Indian Health Advisory Board (UIHAB) – comprised of Tribally appointed health representatives & the Urban Indian Organization (UIO) representatives
- Elevated Office of AI/AN Health Affairs to the UDOH EDO

**B. Improved preventative health education and outreach**
- Emergency Preparedness & Infectious Disease Planning
- Diabetes/Obesity
- Maternal Child Health
- Cancer
- Tobacco Coalitions
- Behavioral health

**C. Improved access**
- Medicaid and CHIP outreach and enrollment (graph)
- Indian Health Care Improvement Act (IHCIA) & Affordable Care Act (ACA)
- Emergency Medical Services
- Certification & training opportunities

## WEAKNESS

**A. Qualified Professionals.**
- Very limited qualified American Indians professionals to provide care at Tribal and Urban clinics

**B. Data**
- Limited data sharing specific to American Indians between IHS, Tribal and urban Indian health programs and the state

**C. Trust**
- Although there have been significant improvements in communication; there remains a historical lack of trust between the Tribes and the State.

**D. Tribal health program capacity**
- Many tribal programs are operated by a skeleton staff, of which many have multiple roles within the programs.

**E. Funding**
- Lack of dedicated funding for this Office. No staff.
- Competition for decreasing resources. The tribal and urban Indian health programs are finding themselves competing more often with state and local programs. Federal resources are increasingly limited or not reauthorized.

**F. Mobility**
- Highly mobile between urban & rural settings for work and educational opportunities. Direct impact on access & eligibility for health programs.

ACTION STEPS IN INDIAN HEALTH FOR 2017

Each year the Utah Indian Health Advisory Board (UIHAB), comprised of appointed health representatives from the 8 tribes and urban Indian Organization in Utah, holds a retreat to address health issues, concerns, and policies impacting their communities. They review, revise and develop new goals, objectives, and action steps targeting overall improvements to health care and access in their communities. The areas of focus for 2017 are:

- Data analysis & Data Sharing
- Strengthening Families
- Gestational Diabetes
- Medicaid Expansion/Medicaid
- Tribal Public Health Preparedness

In collaboration with the Utah Department of Health (UDOH) Office of AI/AN Health Affairs, strategies are developed to initiate action items specific to the areas of focus. Below is a summary of some action items and steps related to and in correlation with the Indian health assessment:

1. **Collaboration & Partnership Development** –
   a. The Office of AI/AN Health Affairs (OAIANHA) was awarded a small grant from the American Public Health Association (APHA) to address awareness of and capacity building among the Utah Tribal Leadership about Public Health. As an outcome from the 2016 –2017 project, it was recommended to conduct an outreach effort with the Utah Tribal Leadership specific to Public Health; Public Health 101. This presentation and event was extremely successful. Some Utah Tribal leadership requested UDOH & OAIANHA support to assess and conduct site visits on what tribal health programs are collecting; how is data collected, is the data appropriate for need, are there gaps, can programs extract data for reporting and grant writing? The Office of AIAN Health Affairs was recently awarded another small APHA grant for 2018. The focus will be to conduct assessments and utilization analysis for those tribes interested in tribal program data evaluation/status.

   b. Beginning in 2018, the Department of Health and the Department of Public Safety, Division of Emergency Management, are collaborating to improve resources to Tribal Emergency programs; the Tribal Public Health Emergency Preparedness (PHEP) Grants & Utah Tribal Emergency Response Committee (UTERC). Our goal is to improve the effectiveness and efficiency of each tribe to complete an emergency preparedness plan(Infectious Disease Response Plan) in addition to participate in emergency management training like Incident Command Structure (ICS), Medical Countermeasures Dispensing (MCD), and table top exercises (state and tribal).

   c. The Utah Birth Defect Network (UBDN) has collaborated with the Utah Indian Health Advisory Board (UIHAB) in education and awareness for the prevention of birth defects. UBDN’s health educator participated in the annual Paiute Indian Tribe of Utah Restoration Pow Wow in June 2017. The Pow Wow was a great opportunity to talk with participants about folic acid for the prevention of neural tube defects as well as Zika virus infection prevention and education. Multi-vitamins with folic acid were distributed along with Zika virus prevention kits and information.

   d. **Zika:** UDOH ongoing outreach and education to AI/AN communities throughout Utah. Through Consultation with the UIHAB representatives, the ZIKA KITS were updated to reflect more culturally
appropriate messages. Zika Kits were distributed at the Governor’s Annual American Indian Summit and made available for all Tribal and Urban Indian health programs. The OAIANHA distributed over 700 Zika Kits to tribes and the Urban Indian Center for the 2017 season. In addition to Zika Kits, culturally appropriate prevention materials were also distributed; *Protect the Circle of Life! Mosquito Prevention Starts with You* (attached).

e. The UDOH Bureau of Epidemiology, Disease Response, Evaluation, Analysis, and Monitoring Program provided an opportunity, through CDC funding to the State, to include up to 4 tribal mosquito abatement sites in Utah during the 2017 season. The tribes who expressed interest included; Confederated Tribe of the Goshute Reservation, Navajo (Utah strip), Paiute Indian Tribe of Utah (Shivwits Band), & Ute Indian Tribe. The purpose of the *Epidemiology and Laboratory Capacity (ELC) Arboviral Contract* is to enhance and provide resources for mosquito surveillance which provides an indication of arboviral diseases such as West Nile Virus, Saint Louise Encephalitis and the introduction of new mosquito species into Utah. The first year of this contract was very successful by having 3 out of the 4 tribes attend annual meetings, conduct mosquitoes surveillance operations and submit mosquitoes for testing at the Utah Public Health Laboratory. We hope that this next year we can extend the contracts to other tribes who might be interested. The Ute Indian Tribe was the first to identify the West Nile mosquito in UT this year as a result of grant. More preparedness resources have been requested by the Tribal leadership for the 2018 season.

f. In Consultation with the Utah Tribal Leadership and the UIHAB, and in partnership with the UDOH OAIANHA, the University of Utah Health Sciences and Health Plans and the Utah Telehealth Network, initiated a state wide internet connectivity assessment on the reservations. The assessments address the request for some specific telehealth services and possible equipment needs. Assessments are ongoing at this time. Currently, the last of connectivity assessments are being scheduled. The White Mesa community is scheduled for the end of November.

g. Utah Department of Health and Utah Public Health Laboratory (UPHL) worked directly with the Ute Mountain Ute Tribe to provide some heavy metal bio monitoring for the White Mesa community in southern Utah. The UPHL was able to test 10% of the population (very successful). This partnership with the UPHL was able to support the Tribes efforts in developing a clean water system for their community on White Mesa. The final analysis has been completed and is in the process of being reported to the tribal environmental program, IHS facility and tribal members tested to establish any follow up as necessary regarding testing outcomes. The Tribal health representative from White Mesa has requested the lab to conduct a follow up testing in light of the new water system being built in that community. This will be determined at a later date and upon review of grant application requirements.

h. Utah Department of Health Oral Health Program traveled to the Ute Indian Tribe Head Start with Lauren Neufeld and the Physician’s Assistant (PA) school with 20 students each day. They did basic physical assessments, oral health risk assessments and placed fluoride varnish. We saw close to 180 kids in 2 days at the Head Start. I am trying to be innovative of helping these children receive access to care.
2. **Tribal Health and Urban Indian Health Program Capacity**

   a. Through Consultation with the UIHAB representatives, the UDOH Maternal Child Health (MCH) Program has awarded the Urban Indian Center of Salt Lake (UICSL) a Personal Responsibility Education Program (PREP) Grant. The PREP funding was utilized by the Urban Indian Center to pilot a comprehensive sexuality education curriculum through their summer youth programming. A group of American Indian youth received an evidence-based sexual health curriculum, called Be Proud Be Responsible, along with a culturally specific supplement, Native Voices. 100% of participants completed the program by the end of Jul 2017.

   Youth participants also assisted adult staff from Urban Indian Center in presenting at the 12th Annual Governor’s Native American Summit at Utah Valley University on July 20, 2017. They presented to youth and parents from across the state on STD and HIV transmission and introduced online resources from Native Voices.

   Urban Indian Center and UDOH staff plans to meet with tribal leaders throughout the fall of 2017. Once local needs and priorities have been identified, they will collaborate with UDOH staff throughout the next year, 2018 to train local tribal representatives and assist each area in piloting their own youth education and development program. The first of these meetings was conducted on September 28, 2017 with representatives from the Paiute Indian Tribe of Utah about the possibility of integrating PREP education into already existing youth programs. Pending tribal council approval, youth program staff will participate in Be Proud Be Responsible training during the winter of 2018 to become certified facilitators and have the capacity to implement the program with youth in Cedar, Shivwits, Kanosh, and Koosharem areas.

   b. In Consultation with the UIHAB representatives, and in partnership with the UDOH’s OAIANHA, the UDOH’s Office of Home Visiting (OHV) is currently able to fund home visiting programs that serve the Navajo, Ute Mountain Ute and Paiute Indian Tribe of Utah. Each of the tribal communities uses the evidence based home visiting model and curriculum used called "Family Spirit," a culturally tailored home-visiting program of the Johns Hopkins Center for American Indian Health designed to promote optimal health and wellbeing for parents and their children. Family Spirit combines the use of paraprofessionals from the community as home visitors and a culturally focused, strengths-based curriculum as a core strategy to support young families. Parents gain knowledge and skills to promote healthy development and positive lifestyles for themselves and their children. Services to the three tribal communities are in the beginning stages but promise to provide a resource in the area of maternal and child health for each community.

   The program (Utah Navajo Health Systems) that serves the Navajo Community is doing well. There are a lot of visits being made and the staff is very engaged in trying to meet the needs of the families enrolled so far. We would like to continue to grow the enrollment to full capacity during the next few months.

   The Paiute Tribe is just at the beginning stages. A Supervisor has been identified and training has been scheduled. We are excited about the growth of the program to this area of the State.

   c. The Utah WIC (Women Children & Infant) Program is making great strides in improving relationships with and services to AIAN’s living in Utah. In 2015, the Utah WIC program reached out to the Utah Navajo Health Systems, Inc. (UNHS) to discuss new ways to improve WIC access. The UNHS offered
office space in a couple of their facilities. Over the last 18 months, the San Juan Health Department focused on opening 2 new clinics in Monument Valley & Montezuma Creek. Currently, the WIC programs travels to the Monument Valley Clinic the second Monday of every month. Before starting at this site, the WIC program saw clients in the Blanding office. The program severed at that time 2 participants. The number of participants at the Monument Valley has now increased to 45. Our number of participants in Montezuma Creek is up to 65. The WIC program serves the Ute Mountain Ute Tribe out of the Blanding office. In addition, the Utah WIC Program acquired a 35’ customized RV hat is fitted with a medical grade interior for purposes of providing WIC and other public health services to these community members. There has been a significant increase in participation due to these efforts. There are ongoing discussion to reach out to other Tribal communities that have gaps in WIC access and services.

3. **Data Sharing** –
   a. Currently, the OAIANHA is in discussions with the Navajo Area Tribal Epi Center to formalize a data sharing agreement focused on infectious disease reporting, mortality and morbidity reporting, and chronic disease reporting/management. Once finalized, this agreement will be for 5 years. Data will be shared between both entities for any community health assessment reporting, program development and goal setting. The Department finalized a similar agreement with the Phoenix Area Tribal Epi Center in 2015. These agreements are a direct result of the NALLC supporting the UDOH request to open the Vital Records Act to amend for inclusion of tribal public health authorities to be recognized as legitimate entities to share data with.

4. **Medicaid Opportunities** –
   a. Through ongoing collaboration, partnership and consultation with Medicaid and the UIHAB, AIAN enrollment and eligibility for Utah Medicaid programs continues to be stable in 2016-2017 reporting. Medicaid meets monthly with the UIHAB representatives to update them on policy, State Plan Amendments (SPA) and Rules, and to follow up with any eligibility and access issues their communities face. Ongoing discussions between the UIHAB, Medicaid and DWS continue on outreach, education and material development in addition to decreasing the number of Medicaid applications being denied.

   b. The Utah Tribal Leadership and the UIHAB representatives continue to support and advocate for Medicaid Expansion options for Utah. Utah’s AI/AN population suffer higher poverty (28%) and childhood poverty (35%) than Utahan’s overall (2015 Census). As of September 2017, approximately 86% of AIA’s living in poverty is enrolled or eligible for Medicaid services. Approximately 38% of AIAN children ages 0-17 living in poverty are enrolled or eligible for Medicaid. Approximately 3% of AI/AN children who are eligible are enrolled in CHIP (Medicaid 9/2017).

   c. Medicaid Expansion options provide a mechanism for AIAN adults who are currently not eligible for traditional Medicaid to receive care and to support the Tribal health programs that provide all or a portion of that care.
